MY PROJECT:

A simple and smart “E-Commerce” web site using
“Core php and java”. Which enhance the small retailers to add their products in our site, so
they canalso earn like some of the developed e-commerce sites.

EXPERIENCE:

JOB PROFILE:

1. COMPANY NAME : THRINIAS TECHNOLOGIES(Startup)
DESIGNATION : FULL STACK DEVELOPER (7 months)
PLACE : VIRUDHUNAGAR.

UI COMPONENTS DESIGNING AND CODING:

1. Identified web based user interactions and developed highly-responsive user interface components via react components.
2. Translated designs and wireframes into high-quality code via javascript following React.js work-flows.

CODE DEBUGGING AND FRONT-END ARCHITECTURE:

1. Troubleshoot interface software and debugged codes to improve functionality and performance by 50%.
2. Developed and implemented front-end architecture to support user interface concepts with 100% accuracy.

BACKEND SUPPORT AND SOFTWARES:

1. Using Google firebase and firestore as a backend software to implement and store the user data.
2. Designed as more flexible to handle and also created a offline support for the users.
3. Moreover the Realtime Database, Cloud Firestore,My SQL uses data synchronization to update data on anyconnected device. However, it's also designed to make simple, one-time fetch queries efficiently.

MERGING CODES AND UPDATES:

1. Git-hub simplifies the process of working with our team and makes it easy to collaborate on projects. Team members can work on files and easily merge their changes in with the master branch of the project.
2. Using Fork for clone operation executed on a server copy of a projects repo. ...and to create a new feature branch in local repo. Work is done to complete the new feature and git commit is executed to save the changes, and then push the new feature branch to the remote forked repo.
